

# ARTLINE FINGERPOST

Sober, elegant and contemporary, the directional masts designed for the city of Reims have character. Their clean lines reinforce the identity of a site. Their modularity is another of their assets: the blades are easy to replace, can be added or removed as required, and can be oriented in 8 directions.

## Technical specifications :

Blade size: 130 x 700 cm (printable area).  
Number of blades: 1 to 7 blades to 8 directions  
Height: 2200 mm under the first directional blade.  
Materials: RAL powder-coated aluminium (colour)  
Decors : Adhesive  
Anchored to a solid base (concrete) using a base plate  
Installation on FERRADIX® optional  
Graphic design and installation optional.

*Please note that specifications are subject to change.*
