

Arté is the perfect solution for your urban signage projects. What really sets Arté apart are its engravings. Its sheet metal can be engraved in straight, geometric or linear shapes, offering great design flexibility. Each shape is meticulously engraved into its surface, adding a touch of elegance and character to your urban environment. When it comes to durability and robustness, Arté makes no compromises. Constructed with an ingenious combination of two T-shaped profiles, it ensures optimum stability and resistance, even in the most demanding urban environments.

Design Pierre Guillemin

Technical specifications :

Sizes (in mm): 1200 X 350 | 900 X 350 | 600 X 350

Slope: 20

Materials: Steel or RAL powder-coated aluminium (choice of colour)

Sheet pattern: Wave, Line, Rhombus

Decors: ClearSign®,

Anchoring: On a concrete base using a base plate

Graphic design and installation optional.

Other types in the range :

Totem

Please note that specifications are subject to change.

Textured colour :

Mars 2525

Black 100 sanded

Grey 900 sanded

Smooth colour :

RAL 8007
Fawn Brown

RAL 5014
Blue grey

RAL 6009
Pine green

RAL 5011
Steel blue

RAL 9005
Black

RAL 3005
Red Wine

RAL 7016
Anthracite

Dimensions (in mm) :

Choix du motif usinés sur la tôle basse :

- Linéaire
- Losanges
- Vagues

Clear Sign®

The solution for your signage

Registered trademark, the Clearsign technique includes its main qualities in its name:

- C** - Clarity
- L** - Lightfastness
- E** - Environment (Eco friendly)
- A** - Abrasion Resistant
- R** - Recyclable

In signage, these advantages are major. The technique is however simple. A powder-coated aluminum plate is printed and powder-coated again. The print is thus encapsulated between two very hard layers. The result is stunning, the colors vibrant, the resistance incomparable, both to shocks, scratches and graffiti.

The decorations are printed in high resolution on a wide range of powder-coated colours. The varnish is necessarily shiny. Not available in matte finish.

Technical specifications:

Finishes:

Gloss - Graffiti resistant coating

Artwork Supply :

Full size, CMYK, 300 dpi jpegs, 5mm bleed, no crop marks

Impression :

Colour printing on white surface
Colour printing on coloured surface
White printing on coloured surface

Maintenance:

Recommended cleaning products*:

Ethanol
Turpentine
Xylene

**Stronger solvents (MEK, Acetone, Nitrocellulose solvent, etc.) should be used with caution and will be the customer's responsibility.*

Please note that specifications are subject to change.

Advantage :

Not flammable

High resolution printing

Easy graffiti removal

Colour Clarity

Visual quality
guaranteed for 7
years (excluding
vandalism)

THE RECOMMENDATIONS

Maintaining your signage

To maintain your signage (all surfaces except wood), we recommend that you completely dust the surfaces approximately once a month using a dry cloth.

Secondly, clean the plates with a soft cloth soaked in household alcohol. This measure will optimize the readability and shine of your plates.

For enameled lava, occasional use of a high-pressure cleaner (apart from the joints) can help lighten the cracking and remove stains and graffiti.

For cleaning specific stains or for any other questions, contact us.
